Claims 1, 2, 5-7, 9 and 11 are presented for examination.

Applicants' amendment and terminal disclaimer filed January 27, 2006 have been received and entered.

Accordingly, the rejection made under obviousness-type double patenting as set forth in the previous Office action dated November 3, 2005 at pages 2-3 over U.S. Patent No. 6,803,376 is hereby withdrawn because the applicants submitted a terminal disclaimer. The rejection made under 35 USC 112, first paragraph as set forth in the previous Office action at pages 3-7 is hereby withdrawn because the applicants amended the claims to recite only gemifloxacin, gemifloxacin methanesulfonate or gemifloxacin methanesulfonate sesquihydrate.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 5-7, 9 and 11 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-11 of copending Application No. 11/023,319. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application teaches a method for modulating metabolism of ciprofloxacin-resistant *Streptococcus pneumoniae* comprising administering a composition comprising gemifloxacin, gemifloxacin methanesulfonate or gemifloxacin methanesulfonate sesquihydrate. Note the modulating metabolism is inhibiting growth of said bacteria or killing said bacteria. The copending application teaches a method for modulating of pneumococcal pathogenic bacteria (includes *Streptococcus pneumoniae*) is ciprofloxacin-resistant. Also note in the copending application the modulating metabolism is inhibiting growth or killing the said bacteria. Clearly, the copending application's method encompasses the present application's method.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1, 2, 5-7, 9 and 11 are not allowed.
